 Modea, FoxGuard Solutions, ViTech, Innovative Interfaces, Archive Core, FluxTeq*

Connecting Virginia Tech students with local employers to retain top talent!

Developing a Destination for Talent connects an untapped pool of Virginia Tech undergraduates to regional employers seeking to find and retain talent and will provide faculty members with networking opportunities. The project benefits Region 2 by highlighting current job opportunities, offering intern slots, and reducing hiring and training costs for the surrounding communities.

"Experiential learning is vital to building a strong pipeline of talent from higher education to our regional businesses. Strong internship programs allow companies to have a competitive edge in recruiting young talent. Through the Virginia Tech led GO Virginia grant, employers can expand their internship programs, hire highly qualified students, and brand their company on campus."
*Erin Burcham,
 Director of Talent Solutions,
 Roanoke Regional Partnership*
