

Public Health Readiness Evaluation (PHRE) Mobile Application

Virginia Tech, ICTAS

Counties of Montgomery, Giles, Floyd, and Pulaski, and City of Radford

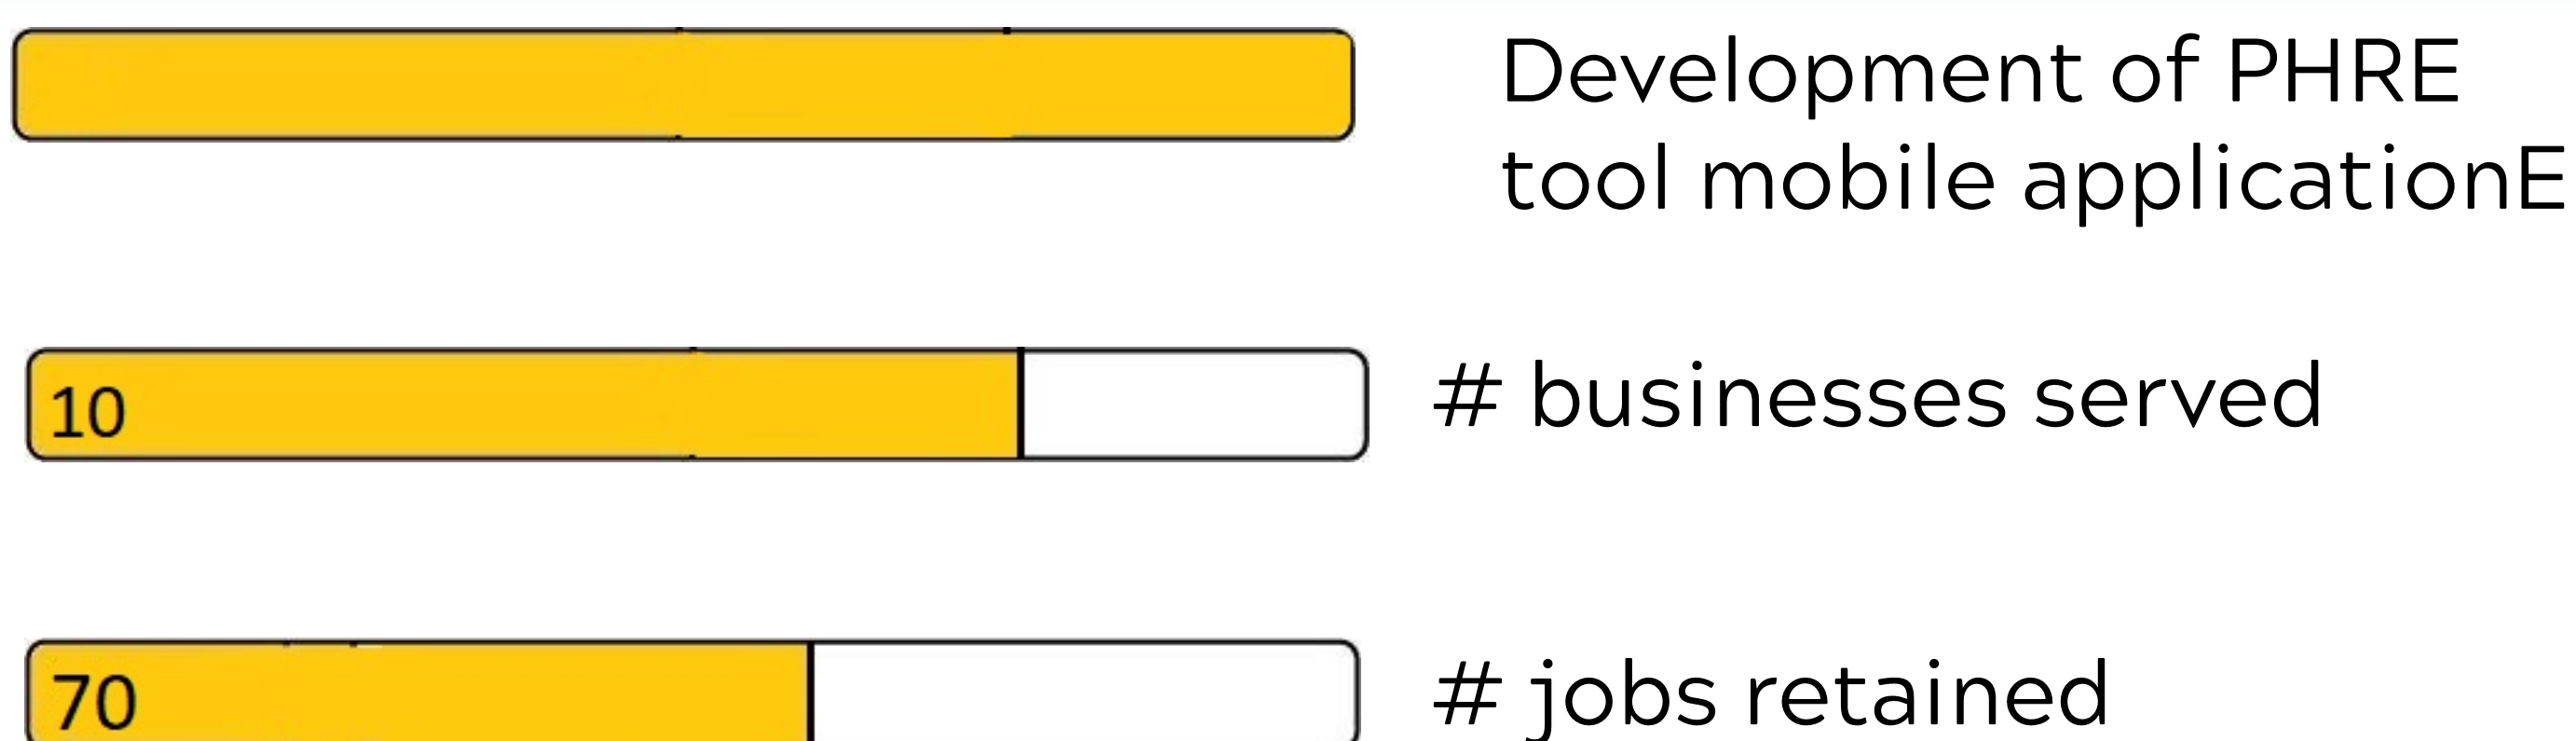

Project Start Date: 10/13/2020
Project End Date: 10/12/2021

Helping small organizations in the New River Valley Region confront COVID-19.

The Public Health Readiness Evaluation (PHRE) tool is an easy-to-use mobile application designed to help smaller organizations quickly assess and optimize their readiness to operate with minimal risk to workers, customers/patrons, and surrounding communities. The tool will be adapted from a safety framework originally developed for small nanotechnology businesses, and will include in-kind efforts from leading risk scientists and mobile application developers.

METRICS

“This tool aims to help businesses return to normal operations quickly and safely. Our aim is to help the region’s smallest businesses help themselves and increase consumer confidence.” Dr. Matthew Hull, Program Manager of the Nano and NanoBio Thrust Areas at Virginia Tech’s Institute for Critical Technology and Applied Science
