

Wood Haven Road Water and Sewer Infrastructure Enhancement

*Western Virginia Regional Industrial Facility Authority
City of Roanoke, Roanoke County, City of Salem*

Attracting businesses to Region 2 through extension of water and sewer facilities, and a Tier 4 Business Ready Site Certification.

The project seeks to attract new businesses to the region through site preparedness by improving site readiness and marketability. Prior to receiving funds, the site was unable to be developed and did not attract businesses to the area. Through the project, water and sewer utility connections to the site will be made ready for use, and these improvements will propel the site to a Tier 4 readiness standard through the Virginia Businesses Ready Sites Program.

METRICS

Three years after project completion, 100- 150 jobs will be created and \$100 million in private investment will be secured.

“This strategic site development project was made possible through our regional partnership with the Cities of Roanoke and Salem through the Western Virginia Regional Industrial Facility Authority and supported by GO Virginia Region 2. The Wood Haven Technology Park is an important centerpiece to the region’s economic strategy.”
Dan O’Donnell, County Administrator, Roanoke County

Developing tomorrow’s business sites today.
